

# HUB WASH UNIT

design by GIOVANNONI DESIGN

Integrated water system with a double pump for mixing clean water and a macerating pump for the drain.

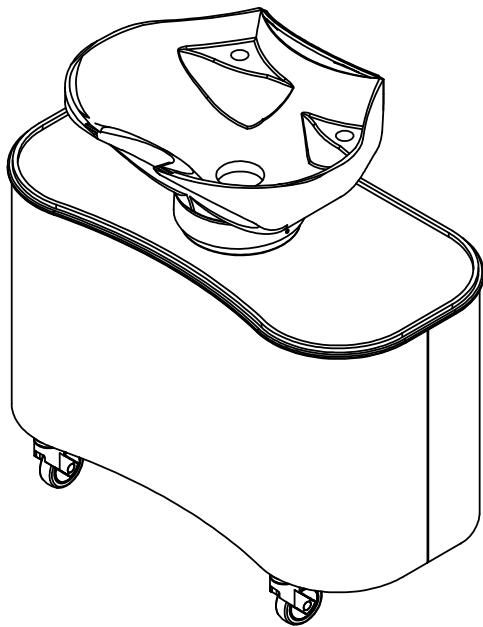

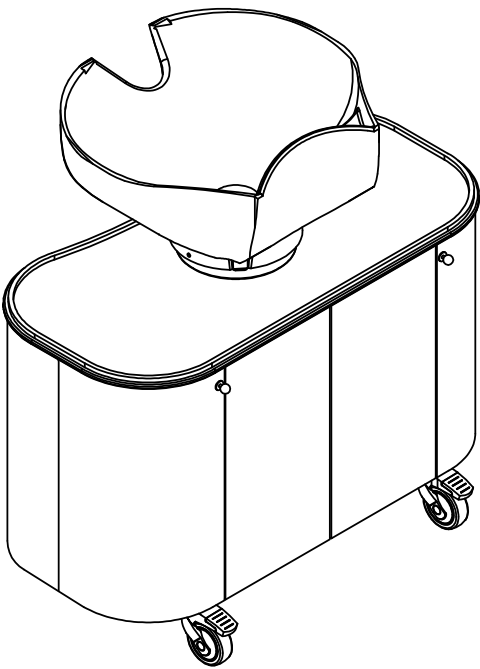

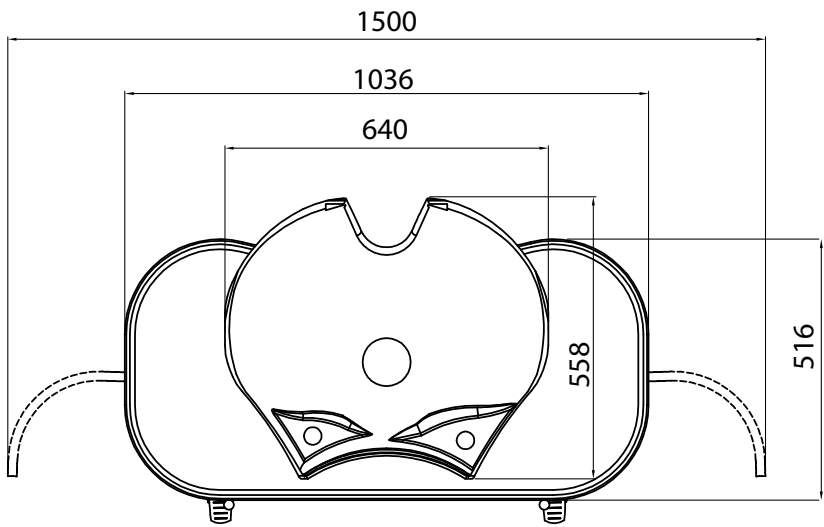

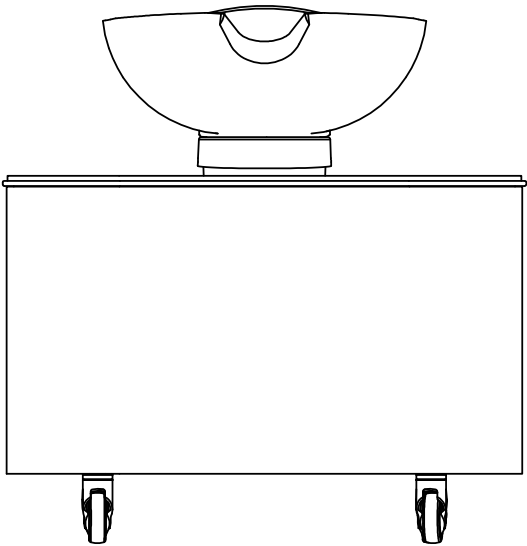

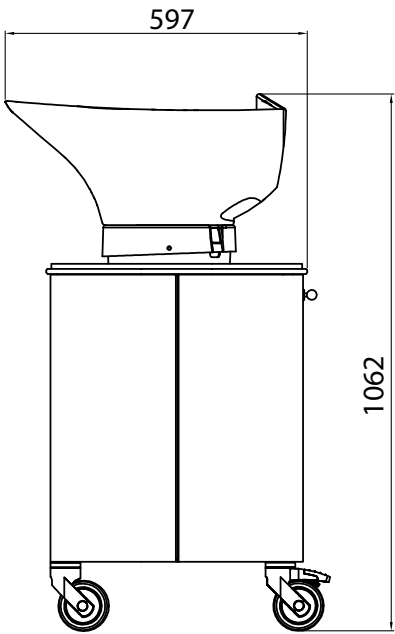

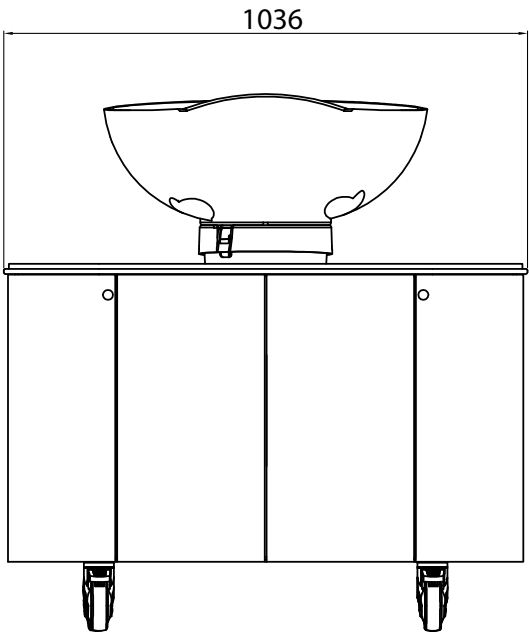

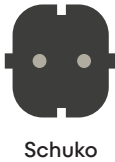

After filling the tanks with water, the system is used to wash hair anywhere in the salon, in the room, on the terrace, in the garden or on the beach.

Self-adjusting water temperature system.

Mains power 2 side storage compartments and a central compartment for easy access to the water tanks. 4 castors, two with brakes, for easy transportation on all types of flooring (including carpet)
